

## 150Kva-120kW Rental Generator MMD Equipment PowerPro™ 150

### Rugged. Quiet. Fuel-Efficient.

MMD Equipment's PowerPro™ mobile generators are engineered to handle the most rugged requirements for construction site or event power. They utilize Delta Demand Excitation™ technology that respond immediately under variable loads. Also, Quietech™ sound reduction makes them quiet enough to provide power for that all-important special event. Because PowerPro™ generators are dependable and easy to operate, they are the right choice for all of your power needs.

### Product Features

- Zero Load Technology- This innovative feature enables units to increase time between regeneration cycles on lighter loads, while extending diesel particulate filtration cleaning intervals.
- Electric Fuel Primer and Air-Bleed (EFPA) Pump. -This pump automatically bleeds air from the system without opening the injector lines if the generator runs on our fuel.
- Automatic shutdowns offer protection from low oil pressure, over-crank, over-speed and high temperature conditions.
- Sound attenuated, sealed weather enclosures are powder coated, and all hardware is stainless steel to maintain a fresh look.
- Off-white cabinet finish minimizes visibility impact.

### Product Specifications

#### Performance Data

Fuel Capacity	215 Gallons (with trailer)
Run Time	25 hrs.

#### Electrical

Nominal Size Rating	120 kW Prime
Main Breaker	394 amps
Voltage	480/208/120V
Connections	Star with Neutral/Zig Zag

#### Motor/Engine

Manufacturer	Isuzu
--------------	-------

#### Dimensions

Length×Width×Height	196×79×85 in.
Weight	9,900 lbs. (fuel filled)
